⭐ Young Firefighters World Champion 1999

⭐ Sold Webpages at 16

SUMMARY

As a Product Manager, Founding Engineer, Full-Stack Developer, and CTO with more than 15 years of experience, I assist start-ups and scale-ups with their technical needs. This includes leadership, strategy, mentoring, architecture, code reviews, and of course, coding. I'm especially adept at working with remote-first companies, having previously founded one and been responsible for developing its internal communication strategy.

EXPERIENCE

CTO & Co-Founder
2016 - Present

amy.app | AI Maths-Tutoring Ed-Tech Start-up
Auckland, NZ

- Scaled the company to ~25 members
- Built a globally distributed tech team spanning over 5 continents
- Reported to the board and CEO via board reports and analytics
- Managed and developed the enterprise, school and student facing products
- Responsible for the software architecture of all internal and external products
- Recruit, hire and mentor tech talent
- Implement product tracking (Mixpanel)to better understand the customers journey
- Implemented and managed the product monetization system (Stripe)
- Created a real-time, multi-user question editor with React to handle over 100k items
- Improved content compiler for real-time operation, cutting run time from 2 days
